

Quickdraw[®]

CONVEYOR SYSTEMS

Connecting Your Workplace

Quickdraw designs and manufactures conveyor systems for factory automation. A full line of modular components, both standard and custom, are ideal for micro-electronics, automotive sub-assemblies, medical, laboratory, semiconductor, and many other applications. The company serves domestic and international markets.

HD SERIES

DESIGNED FOR HEAVY-DUTY APPLICATIONS

The Quickdraw **HD Series** conveyor offers the same benefits as the MR Series except that it is designed for heavy-duty applications. It works with most framing extrusion brands and has a compact profile. A gear motor directly drives each roller rail, eliminating the rail-to-rail drive shaft and permitting easy width adjustments to handle different size products. Lengths are available in 2-inch increments (the roller pitch for this conveyor) up to 120 inches per conveyor section.
